

[2017 PDF free download Download Free Cisco 210-260 Exam PDF Study Materials At Lead4pass, Latest 210-260 Exam Dumps Questions With High Pass Rate

Best Cisco 210-260 pdf exam study materials are written according to the latest real IT exams. All the Cisco 210-260 exam practice questions and answers are revised by the skillful experts. <http://www.lead4pass.com/210-260.html> 100% success and guarantee to pass 210-260 exam test quickly and easily at first attempt.

QUESTION 1

How does a device on a network using ISE receive its digital certificate during the new- device registration process?

- A. ISE acts as a SCEP proxy to enable the device to receive a certificate from a central CA server.
- B. ISE issues a certificate from its internal CA server.
- C. ISE issues a pre-defined certificate from a local database.
- D. The device requests a new certificate directly from a central CA.

Correct Answer: A

QUESTION 2

Refer to the exhibit.

```
Username HelpDesk privilege 9 password 0 helpdesk
Username Monitor privilege 8 password 0 watcher
Username Admin password checkme
Username Admin privilege 6 autocommand show running
Privilege exec level 6 configure terminal
```

The Admin user is unable to enter configuration mode on a device with the given configuration. What change can you make to the configuration to correct the problem?

- A. Remove the autocommand keyword and arguments from the username admin privilege line.
- B. Change the Privilege exec level value to 15.
- C. Remove the two Username Admin lines.
- D. Remove the Privilege exec line.

Correct Answer: A

QUESTION 3

When an administrator initiates a device wipe command from the ISE, what is the immediate effect?

- A. It requests the administrator to choose between erasing all device data or only managed corporate data.
- B. It requests the administrator to enter the device PIN or password before proceeding with the operation.
- C. It notifies the device user and proceeds with the erase operation.
- D. It immediately erases all data on the device.

Correct Answer: A

QUESTION 4

You have implemented a Sourcefire IPS and configured it to block certain addresses utilizing Security Intelligence IP Address Reputation. A user calls and is not able to access a certain IP address. What action can you take to allow the user access to the IP address?

- A. Create a whitelist and add the appropriate IP address to allow the traffic.
- B. Create a custom blacklist to allow the traffic.
- C. Create a user based access control rule to allow the traffic.

- D. Create a network based access control rule to allow the traffic.
 - E. Create a rule to bypass inspection to allow the traffic.
- Correct Answer: A

QUESTION 5

What is a benefit of a web application firewall?

- A. It blocks known vulnerabilities without patching applications.
- B. It simplifies troubleshooting.
- C. It accelerates web traffic.
- D. It supports all networking protocols.

Correct Answer: A

QUESTION 6

Refer to the exhibit.

```
crypto ikev1 policy 1
encryption aes
hash md5
authentication pre-share
group 2
lifetime 14400
```

What is the effect of the given command sequence?

- A. It configures IKE Phase 1.
- B. It configures a site-to-site VPN tunnel.
- C. It configures a crypto policy with a key size of 14400.
